

Product name	Stopseal® Fire Pillows
Product Code	S100/S250/S800
Revision Date	25/05/09
Revision number	01
Ref	PILLOW

**INTRODUCTION**

Firestopit Stopseal® Fire Pillows are an ideal product to create a temporary or permanent fire barrier around all types of services to prevent the passage of fire through a compartment wall or floor, especially suitable where services are continuously being changed or replaced.

Stopseal® Fire Pillows are filled with organic fillers and intumescent additives in a waterproof glass cloth bag on the outside.

**The advantages of using fire pillows are as follows:**

- Offers a fire barrier up to 4 hours to BS 476 part 20 and 2hrs EN1366.
- Remains flexible between -20°C to +130°C.
- Suitable for indoor and outdoor locations up to 1m².
- Non-combustible and non-toxic.
- Ease of installation and long life.

## INSTALLATION

Installation details and technical support are available from Firestopit technical department or on the internet at [www.firestopit.com](http://www.firestopit.com)

- Pack bags tightly into the opening around the services to a minimum depth of 150mm.
- For floor openings install a 5mm mild steel mesh, arrange fire pillows on the flat side to a minimum depth of 150mm.
- When cable trunkings pass through the seal infill with Stopseal® sausage pillows.
- Always ensure that large voids are completely filled and fire pillows are packed tightly.
- Ensure records of all installations are kept.

**For further information see Installation Manual.**
